CONSENT FOR ANESTHESIA / SEDATION

Date: _____

Diagnosis: _____

Operative _____ Procedure _____ / _____ Operation: _____

Type of Anesthesia: ☐ Local ☐ General ☐ Spinal ☐ Epidural ☐ Nerve Block ☐ Combined

I (Patient Name), give my full consent as an act of my own free will to undergo the following surgery / procedure..... at CURA Hospital. I understand that the above mentioned procedure necessitates the administration of local/ sedation / regional/ general or any combination thereof to their associates to provide the required anesthesia service.

I understand that anesthetic agent could be administered by injecting in to the bloodstream (LV. LINE), breathed into the lungs, injected through a needle / catheter placed either directly into the spinal canal or immediate outside the spinal canal. Nerve block is achieved by injecting the anesthetic agent near the nerves.

I understand that the results and effects of anesthesia depends on the type of anesthesia administered and it can vary from temporary decreased loss of feeling / numbness, loss of movement to total unconscious state.

I have been explained that all forms of anesthesia involve some risks and no guarantees or promises can be made concerning the results of the procedure / treatments. I understand that there are some infrequent complications that can occur due to use of anesthesia. These include bruising, pain or some injury at the site of injections, temporary breathing difficulties, temporary nerve damage, muscle pains, asthmatic reactions, headaches, the possibility of sensation during the operation (especially with Cesarean section and some emergency procedures), damage to teeth and dental prostheses, lip and tongue, temporary difficulty in speaking or hoarseness of voice and epileptic seizure. There can also be some very rare, but serious complications including: heart attack, stroke, severe allergic or sensitivity reactions, brain damage, kidney or liver failure, lung damage, paraplegia or quadriplegia, permanent nerve or blood vessel damage, eye injury, damage to the larynx (voice box) and vocal cords, pneumonia and infection from blood transfusion. The possibility of more serious complications including death is quite remote, but it does exist.

I have been explained in the language known & understood by me about the nature of the surgery / procedure, type of anaesthesia used, and it's benefits, and costs, risks associated with it, other alternatives and its prognosis.

I understand that Local anaesthesia with or without sedation may not be successful and therefore an alternative method may be used as deemed necessary.

I hereby absolve CURA Hospital and its surgical team & hospital staff of any liability for consequences arising because of the above-mentioned surgery / procedure.

Consent of Patient Representative / Surrogate

The patient is unable to give consent because he/she is minor/ Unconscious/.....and hence I.....

(Name / relationship with Patient) therefore give my consent on behalf of the patient after discussion with the Doctor for the above mentioned Surgery / operative / Invasive Procedure.

Intended benefits

Relief from diagnosed illness, _____

Potential risks

I understand that all procedures carry certain risks. The potential risks and complications from this procedure are :
Bleeding, Infection, _____

I have been explained the implications of not undergoing this procedure and the alternative methods of treatment like

I am now aware of the intended benefits, possible risks & complications, and available alternatives to the said operation/procedure. I am also aware that results of any operation/procedure can vary from patient to patient; and I declare that no guarantees have been made to me regarding success of this operation/procedure. I am aware that while majority of patients have an uneventful operation and recovery, few cases may be associated with complications. I am aware of the common risks and complications associated with this operation/procedure and understand that it is not possible to list all possible risks and complications of any operation/procedure.

I also understand that sometimes a planned operation/procedure may need to be postponed or cancelled if patient's clinical condition worsens or due to any unforeseen technical reason. I am also aware that I can withdraw my consent at any point of time at my own risk and consequence, by submitting the withdrawal in writing.

I understand that if medical exigencies demand, further or alternative operative/procedural measures may need to be carried out, and in such case there may be difference in the planned and actual operation/procedure. I am aware that I may require administration of blood and/or blood products during or after the operation/procedure as found necessary by the doctor (for which a separate consent shall be obtained).

I am now also aware that during the course of this operation/procedure the doctor will be assisted by medical and paramedical team, and that the doctor may seek consultation/assistance from relevant specialists if the need arises.

I agree to observing, photography (still/video/televising) of the procedure (including relevant portions of my body) including my diagnosis/reports (pathology, radiology, etc), for academic/ medical/medico-legal purposes, provided my identity is not revealed by such acts. I also agree to my clinical details being shared for scientific publications if my identity is not disclosed.

I am also aware of the expected course after the operation/procedure and the care to be provided, and understand that sometimes admission to an Intensive Care Unit and/or extension of duration of hospitalization may be required and/or there may be requirement of extra medicines or treatments, thereby leading to increase in the treatment expenses, depending upon the body's response to the treatment/procedure.
